

Antenna Mounts

Fixed Crossover Assemblies

These versatile pipe-pipe assemblies are used to secure two pipes at right angles (90°) to each other. Three different sized plates and numerous u-bolt to u-bolt combinations are available, which covers the majority of common pipe-pipe possibilities.

Each kit contains a connection plate and four u-bolt assemblies. All parts are hot dip galvanized for maximum corrosion protection.

Adjustable Crossover Assembly

The Adjustable Crossover Assembly can mate two variable-sized structural members at 90°. The maximum size of the members is 4¾" wide by 4½" deep. This is very useful when the required member size connection is unknown.

2. 2⅞" OD pipe can be exchanged for a 3" OD pipe.

Adjustable Parallel Clamp Assemblies

The Adjustable Parallel Clamp Assemblies allows parallel connection of two similar- or dissimilar-sized members. To see which clamp assembly is required for your application please review the figure on page 98 near the back of this catalogue. Or call Trylon TSF if your members are substantially different from this figure. All material is hot dip galvanized.
